Education

Nanyang Technological University, Singapore

Bachelor of Computing in Computer Science with a Second Major in Business

Jul 2023 – May 2027

CGPA: 4.87/5.00 — Dean's List

National University of Singapore

SUSEP Partial Exchange

Jul 2024 – Dec 2024

Experience

Mergers and Acquisitions Operations Intern

Dec 2024 – Jan 2025

PwC, Singapore

Singapore

- Conducted buy-side due diligence for key targets in the SEA region, identifying critical value drivers and risk areas.
- Supported private equity buyers' investment thesis by analyzing growth opportunities, cost structures, and operational efficiency.
- Quantified synergy opportunities across technology and workflows, uncovering potential cost savings.
- Delivered actionable insights through detailed due diligence reports, enabling data-driven investment recommendations.

Full Stack Development Intern

Jun 2024 – Jul 2024

DoozieSoft

Bangalore, India

- Engineered a full-fledged temple management website using the PERN stack (PostgreSQL, Express, React, Node.js), registering over 2000 users and facilitating 500+ secure transactions through Razorpay with a 98% success rate.
- Designed and deployed 15+ microservices, reducing API response times by 40%.
- Integrated WhatsApp APIs for OTP generation and notifications, enhancing user authentication and engagement, along with automated audit logs and receipt generation for secure transactions.

Undergraduate Research Assistant

Aug 2024 – Present

NTU

Singapore

- Assisted in developing optimized deep learning models for novel view synthesis in medical volume reconstruction, focusing on improving current techniques to boost computational efficiency.
- Advanced research on novel view synthesis for medical volume reconstruction enhances 3D imaging techniques, enabling more accurate diagnostics, minimally invasive surgeries, and personalized treatment planning.

Student Researcher - Statistics

Jan 2025 – Present

Imperial College London & NTU

Singapore

- Conducted in-depth analysis of peer-reviewed research in Statistics, summarizing complex methodologies and results into actionable insights, emphasizing precision and clarity.
- Collaborated with cross-institutional teams to dissect and interpret statistical models, leveraging technical discussions with research authors to enhance problem-solving and analytical rigor.
- Produced structured summaries and reflective reports, utilizing advanced comprehension and documentation techniques to consolidate statistical concepts and identify real-world applications.

Projects

SingScape - NTU, Singapore

- Developing a full-stack web application for seamless attraction booking, integrating user authentication, dynamic pricing, and real-time availability tracking.
- Implementing front-end using React.js, ensuring a modern and responsive UI/UX, and back-end with Node.js and Express for efficient API handling.
- Building a scalable and optimized database using PostgreSQL, incorporating indexing and caching techniques for high-performance queries.
- Mastering the full Software Engineering Lifecycle, including requirements elicitation, use case diagrams, class diagrams, sequence diagrams, and flow diagrams to ensure a well-structured development process.
- Maintaining comprehensive software documentation covering system architecture, API specifications, and deployment strategies, adhering to industry standards.

Phishing Email Detection using Machine Learning - NTU, Singapore

- Designed a Machine Learning solution to accurately classify and detect phishing emails, providing practical insights to prevent individuals from falling victim to phishing attacks in real-world scenarios.

- Utilized Logistic Regression, Random Forest, GRU Neural Network, and SVM machine learning models, with the best-performing model achieving an F1-score of 0.97.
- Developed an explainability framework to interpret model predictions, enhancing trust in AI-driven phishing detection.

Biometric Attendance System - *Excelsoft Technologies Pvt Ltd, Mysore, India*

- Collaborated with a team of 5 developers to design and deliver an employee attendance system, working closely with system engineers, QA, and testing teams.
- Developed a facial recognition system using PyTorch, integrated with the Django framework for seamless implementation.
- Utilized four Machine Learning models and frameworks; implemented convolutional neural networks and deep learning algorithms to optimize facial recognition accuracy and efficiency.
- Deployed the solution on a secure cloud infrastructure, ensuring scalability and real-time processing for employee authentication.

Leadership & Extra-curriculars

Analyst, Mergers and Acquisitions - *NTU Investment Banking Club, Singapore* Aug 2024 – Present

- Performed valuation analyses, including comparable companies and transaction multiples. Utilized Discounted Cash Flow (DCF) models to derive intrinsic value, applying key metrics such as WACC and Beta.
- Presented M&A case assessments by developing business plans, performing strategic fit and financial due diligence, and pitching mock mandates to seniors for feedback. Gained hands-on experience with buy-side and sell-side processes.

Vice President, Academics - *Machine Learning and Data Analytics Club, NTU* Jul 2024 – Present

- Designed and conducted hands-on workshops on Deep Neural Networks, including CNNs, RNNs, and Transformers, guiding participants through model architecture, optimization techniques, and real-world applications.
- Hosted interactive sessions on Large Language Models (LLMs), covering fine-tuning methodologies, prompt engineering, and deployment in industry use cases.

Peer Tutor, Statistics and Analysis - *NTU, Singapore* Aug 2024 – Present

- Conducted weekly peer tutoring sessions for up to 80 university students, breaking down complex statistical concepts into easily digestible explanations.
- Developed structured lesson plans covering probability distributions, hypothesis testing, and regression analysis, enhancing students' analytical skills and academic performance.
- Provided one-on-one mentoring, tailoring explanations based on students' learning styles, resulting in a significant improvement in comprehension and test scores.

Business Development Director - *NTU Model United Nations* Jun 2024 – Present

- Led sponsorship outreach efforts, securing funding and corporate partnerships to support event operations and delegate participation.
- Designed engagement strategies to increase university-wide participation, improving delegate registration.

IEEE Tech Main Committee - *IEEE NTU Student Branch* May 2024 – Present

- Organized and led workshops on cutting-edge technologies, including AI and blockchain, providing hands-on exposure to students.
- Coordinated technical hackathons and ideation challenges, fostering innovation and interdisciplinary collaboration among NTU students.
- Managed outreach initiatives to industry experts and research professionals, facilitating guest lectures and networking events.

Skills and Interests

Programming Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, R

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, PyTorch, Flask

Frameworks: Microsoft Excel, PowerBI, Powerpoint, Tableau, AWS, React, Node.js, Django, Redux, Express, Material-UI, MongoDB

Business/Finance: NPV, IRR, MIRR, WACC, Equity markets, Bond markets, Portfolio analysis, Corporate Finance, Investments, Marketing, M&A, Bloomberg Terminal

Interests: Classical Piano - Trinity Grade 8, State Level Badminton Player, Chess
